EDUCATION

Universitas Gunadarma — Bekasi, ID
B.Sc. Computer Science — GPA 3.71/4.00 — Sept 2023 – Present

EXPERIENCE

Asah Led by Dicoding (Cohort) — Remote
AI Full-Stack Developer — Aug 2026 - Present
- Selected as a Cohort student to learn modern full-stack development and applied AI, focusing on AI model integration to build end-to-end solutions

Coding Camp DBS Foundation (Cohort) — Remote
Full-Stack Developer — Feb 2026 – Jul 2026
- Developed core UI and backend services for Emigria, an AI-powered platform detecting fraudulent overseas job postings targeting Indonesian migrant workers.
- Engineered a two-stage AI pipeline integrating Google Gemini API for multi-modal data extraction with a TensorFlow MLP model for fraud classification.
- Architected backend REST APIs using Express.js and FastAPI connected to a Neon PostgreSQL database.

Lembaga Pengembangan Komputer (LEPKOM) Gunadarma — Bekasi, ID
Course Participant, Web Development — Sep 2023 – Jun 2026
- Completed a structured 3-year (6-semester) programming curriculum, progressing from database fundamentals to full-stack web application development.
- Built a foundation in relational database design through Fundamental DBMS and Database for Beginner modules, covering schema design and SQL querying.
- Practiced core web programming through Web Programming for Beginner, then expanded into backend development with Go and C# across advanced semesters.
- Completed capstone coursework in Web Application Development with Go, applying full-stack concepts learned across the program.

PROJECTS

Glance — Contextual AI Assistant — Github
- Developed a lightweight macOS menu-bar utility that captures selected screen text via a global shortcut to stream instant AI explanations.
- Minimized idle system memory to a near-zero RAM footprint by engineering a gated clipboard listener and webview teardown on close.
- Integrated Groq API (Llama 3.1) supporting streaming responses, dual modes (Explain/Summary), and multi-turn follow-up conversations.
- **Utilized:** Tauri v2, Rust, Svelte 5, Vite, Groq API (GPT-OSS-20B)

Emigria — AI Fraud-Detection Platform — Github
- Built as Full-Stack Developer within a 6-person team, flagging fraudulent overseas job postings targeting Indonesian migrant workers.
- Implemented a two-stage AI pipeline combining Gemini API data extraction with a TensorFlow MLP fraud classifier.
- Deployed the platform on Render with Docker, connecting the web app to a Neon PostgreSQL database.
- **Utilized:** React, Vite, Tailwind, Express.js, FastAPI, Gemini API, Neon (PostgreSQL), Docker

SocialCollateral AI — Social Graph Risk Engine (MVP) — GitHub
- Contributed as Graph Visualization Specialist, building the interactive trust-graph view for microfinance lending.
- Combined graph analytics, NLP (Gemini), and computer vision (Google Cloud Vision) to convert social signals into a Group Trust Score.
- **Utilized:** TypeScript, React, Sigma.js, Chart.js, Python, FastAPI

SehatHemat — Budget & Nutrition Planner (MVP) — GitHub
- Built a full-stack dietary and budget planning web app helping users hit calorie, protein, and budget targets.
- Implemented a Retrieval-Augmented Generation (RAG) architecture grounded in a curated Indonesian food-price dataset.
- Designed the relational schema and managed data querying using Prisma ORM with PostgreSQL.
- **Utilized:** Next.js, TypeScript, Prisma, PostgreSQL

ACHIEVEMENTS

Top 15 — Amartha × GDG Jakarta Hackathon — Nov 2025
- Awarded Top 15 Finalist out of 140+ competing teams for engineering SocialCollateral AI, a social-graph risk engine for microfinance lending.
- Designed and developed an interactive borrower trust-network view using React, TypeScript, and Sigma.js.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript
- **Web:** React, Next.js, Astro, Svelte, Express.js, Tailwind CSS, REST APIs
- **Data:** PostgreSQL (Neon/Supabase), MySQL, Prisma

CERTIFICATIONS

Full-Stack Web Developer — Coding Camp 2026 by DBS Foundation, 2026
Belajar Fundamental Back-End & Aplikasi Web dengan React — Dicoding, 2026

English for Business Communication — The British Institute × DBS Foundation, 2026
Practical React.js & Next.js — Udemy, 2025
SQL Advance — HackerRank, 2025
Web Developer — GDGoC Bootcamp Kilat, 2025
